

I live in Oceanside and in a valley where we do not receive the greatest reception on the radio. I love listening to K-Love FM radio station because it continues to provide my family (consisting of 2 elementary kids) with wholesome & clean music. I am active in the community in that I volunteer at church and at my kids' public school and I enjoy the music on K-LOVE which encourages to continue to help others in my community. Also the music and the messages on that station calms in down in traffic. Again, due to the bad signal/reception we get here, it would be in poor judgment to allow the LPFM stations to take priority over current FM translator service.
